Abstract

The utility model relates to a cosmetic cream containing water-alcohol extracts of poplar-type propolis, Mursalski tea (*Sideritis scardica*) and white beeswax and finds application in the cosmetic industry and skin care. The cream combines the beneficial properties of the poplar-type propolis, Mursalski tea (*Sideritis scardica*) and the white beeswax, as anti-inflammatory, antibacterial, antimicrobial, antioxidant action, ensuring protection against ultraviolet rays, moisturizing, softening, and protecting the skin, without causing irritation or skin rashes.
