The Eurostars project, led by partners from Switzerland and South Korea, seeks an engineering SME to develop an integrated monitoring device that combines air sampling with PCR (Polymerase Chain Reaction) diagnostics to detect airborne viruses on farms. The device will enable non-experts to detect three target viruses in the air simultaneously, providing farmers, veterinarians and animal health services with a practical, non-invasive solution for virus monitoring.

A German SME leads an R&D project to advance ultrafast 2 µm laser bonding of Si, sapphire, and Ge for high-precision, defect-free joining. The goal is to overcome thermal damage and low reliability of traditional methods via tailored beam shaping and nonlinear effects. Two other partners contribute expertise in bonding processes and sapphire optics. The consortium seeks an established partner in PIC integration or advanced packaging for validation and use-case input for a German national call.
